

AROMATIC VERSUS ALIPHATIC

COMPARING THE 2 TYPES OF URETHANE COATING

Urethane roof coating is a solvent-based coating that is becoming more popular on the roofing market.

There are two types of urethane roof coatings:
aromatic and aliphatic.

Used as base coat
and interior
applications

Used as top coat
and exterior
applications

Not UV Stable,
degrades
under sunlight

UV Stable,
more durable
under sunlight

Moderate-to-high
solids content

Low-to-moderate
solids content

\$\$
