

Rook Leak Action Plan

That afternoon shower could bring a stream of water into your commercial or industrial facility. That's why we put together this action plan for when you find a leak in your commercial, industrial or manufacturing facility.

West Roofing Systems, Inc.

Minimize Interior Damage

Clear the area of people, equipment, and supplies to reduce damage.

STEP
01

STEP
02

Mark the Point of Entry

Make sure you mark where your leak is located with duct tape.

Look for More Problem Areas

Look around your facility for more problem areas.

STEP
03

STEP
04

Call Your Roofing Contractor

Your roofing contractor will recommend a solution to you based on the severity of damage.

Review Your Warranty

Your roof may be under warranty from the contractor or manufacturer
